Tennis Nutrition Facts

There are so many diets, and many of their inventors are making big bucks by raising false hopes and making false claims. Any diet will cause weight loss in the short run, but most lead to cravings and binging and eventual weight *gain* – and some may even be **harmful** to your body. It's hard to sort out fact from fiction. Are carbohydrates bad? Is fat the root of evil? Here's the real story, based on nutrition science.

Carbohydrates

Why do I need them?

- They are body's **main source of energy** and help maintain blood sugar
- They are stored in the **muscles** to be used as energy between meals and snacks
- They are an important source of **fiber, B vitamins, and iron**
- They bulk up in the tummy and help us **feel full**

How much do I need?

- At least **2 servings** of carbs (grains) at each meal (**3x/day**)
- **1 serving** of carbs for a snack (**2x/day**)

What are some healthy sources of carbohydrates?

- Whole wheat grains: breads, pastas, brown rice, bagels, muffins
- Starchy vegetables: corn, peas, potatoes
- Legumes / beans: pinto, navy, black, black-eyed peas
- Pretzels, popcorn, wheat crackers

Protein

Why do I need it?

- Your body needs protein to build and repair **muscles**
- It is the building block of **major organs**

- Every **enzyme** in our body, many **hormones**, and our **antibodies** are all made of it
- It provides a feeling of **fullness**
- It is an important source of **iron, zinc, and niacin**

How much do I need?

- A **3-oz. serving** at meal time (**2x/day**)
- A **1- to 2-oz. serving** at snack time (**1-2x/day**)

What are some healthy sources of protein?

- Lean beef, pork, turkey, venison, lamb, seafood and fish
- Tofu and veggie burgers
- Peanut butter and nuts
- Eggs, milk, yogurt, cottage cheese

Fat

Why do I need it?

- Fat is an important energy source and helps to maintain our immune system
- It helps manufacture hormones like estrogen and thyroid
- It is necessary for cell growth
- It helps us feel full and adds flavor and enjoyment to foods

How much do I need?

- A minimum of **1 teaspoon of vegetable fat** per meal and snack
- Take your weight, cut it in half – that's how many fat grams to eat a day (120 lbs. = 60 grams)

What are some healthy sources of fat?

- Peanut butter and other nut butters
- Vegetable oils including olive, safflower, peanut, corn, canola

- Cheese, avocados, olives, legumes, nuts/seeds
- Mayonnaise, margarine, butter, sour cream, salad dressings
- Ice cream, cookies, candy bars, muffins, donuts, chips, crackers, croutons
